SRP−dependent cotranslational protein targeting to membrane
Viral gene expression
Nuclear−transcribed mRNA catabolic process, nonsense−mediated decay
Peptide biosynthetic process
Ribosome biogenesis
Cellular macromolecule biosynthetic process
Gamma−aminobutyric acid signaling pathway
Focal adhesion
Cytosolic ribosome
GABA−A receptor complex
Dendrite membrane
Polysome
Clathrin−sculpted gamma−aminobutyric acid transport vesicle membrane
Membrane raft
RNA binding
GABA−gated chloride ion channel activity
GABA−A receptor activity
Ubiquitin protein ligase binding
Transmembrane receptor protein tyrosine kinase activity
Insulin receptor binding
Disordered domain specific binding
